## Personal statement

I'm a constant learner. Each project is an opportunity towards discovering new tools and processes, as well as cultivating new a better understanding of technology, and our relationship to it. I like to make things that have both physical and digital dimensions to them. In my work, I try to manifest the convergence of these two fields in the form of interactive installations, games, and wearable devices.

I'm always looking at our relationships to technology and the ways we wield it: how it does things for us, and to us.

## Experience

### Design/Development Intern, Cipher Prime Fall 2015 - Present

Assisting with design and development of video games and interactive media in various frameworks such as Unity, Cinder, and P5.js.

### Interaction Design Intern, Night Kitchen Fall 2014 - Present

Leading design/development research by exploring new tools for the web and interactive installations and demonstrating implementations to the rest of the team.

### Lead Technology Instructor, Lavner! Camps Summer 2014

Taught campers to make interactive game experiences with Clickteam Fusion, simple robotics with Lego Mindstorms, and architectural principles with Minecraft.

### Design Intern, PostGreen Homes Summer 2013

Designed and modeled bathroom and kitchen cabinetry in Rhino to be CNC'd and put into production.

## Core Competencies & Disciplines

### Design Research

The first step to solving a problem is understanding it. By interviewing stakeholders and testing prototypes, I can better understand what the solution is.

### User Experience

I'm focused on making products centered around the people that will use them, making their interaction as intuitive as possible.

### Poetic Computation

I approach code like creative writing—focusing on the mechanics, the demystification of tools, and hacking the conventions of art-making with computation.

## Skills

### Adobe Suite

Photoshop

Illustrator

InDesign

### Code / Web

Processing

openFrameworks

Unity

Arduino

HTML/CSS

JavaScript/webGL

### 3D Modeling

Cinema 4D

Rhino

SketchUp

### Analog

Sketching

Woodshop Tools

## Education & Honors

### Bachelors of Science in Industrial Design University of the Arts, Class of 2014

3.0 GPA

President of UArts Literary Society (2012-2014)

Teaching Assistant for Design Semantics (2014)

### Achieved the rank of Eagle Scout BSA Troop 139, 2010
